PROJECT 3D DESIGN DISCLAIMER & APPROVAL

ADDRESS:

166 Fairground Lane
Mountain City, TN

PROJECT: Four Seasons Room + Deck

The CAD drawings and 3D renderings provided are intended **for general visualization and structural reference only**. They are not intended to represent final aesthetics or exact finished conditions. By reviewing and approving these drawings, the client acknowledges and agrees to the following:

1. **Structural Reference Only** – The CAD design is provided to confirm placement of windows, doors, hardware, and other structural elements.
2. **Not a Direct Representation** – The drawings are conceptual and should not be considered an exact depiction of the finished project.
3. **Measurements** – While dimensions are provided for planning, final field measurements may differ slightly and will govern the actual installation. Measurements are for reference purposes only and are approximate.
4. **Colors & Materials** – Colors, finishes, and patterns shown in the CAD images exist only for visualization. Final materials, textures, and colors selected by the customer may vary from what is displayed in the design.
5. **Pattern/Finish Variations** – Any representations of flooring, tile, stone, or other patterned surfaces are approximations and may not match the final installed product.
6. **Revisions** – Homeowner is responsible for reviewing the design carefully and communicating any necessary changes prior to final approval.

By approving the CAD drawings, the client confirms understanding of the above limitations and acknowledges that final construction and materials will take precedence over the digital representation.
